About Me

With over 6 years of experience in web development, I have built and maintained web applications using modern frontend and backend technologies. I specialize in creating user-friendly, scalable solutions from requirement gathering to production deployment. I am passionate about continuous learning and delivering high-quality digital products.

Core Competencies

- Web Application Development
- Web Site Development
- Backend Development
- UI/UX Design

Education

Information Technology
Royal University of Law and Economics   2017 - 2021

I studied Information Technology with a strong focus on software development, web technologies, and computer systems. My studies provided a solid foundation in programming, web application development, database design, and system analysis. I gained hands-on experience with both frontend and backend technologies, learned software engineering principles and the application development lifecycle, and developed strong problem-solving and analytical skills through academic projects involving real-world system development.

Bac II
Prasot High School   2014 - 2017

I completed Bac II, with a study focus on core academic subjects including Mathematics, Khmer Literature, English, and Science. This level of education emphasized analytical thinking, problem-solving, and academic discipline, providing a strong foundation for higher education and future professional studies.

Experience

Senior Frontend Developer
Maya Technology   2025 - 2026

- Develop and maintain web applications and websites using Vue.js 3
- Integrate third-party libraries and UI component frameworks such as Tailwind CSS, Ant Design, PrimeVue, and ECharts
- Build, test, and deploy applications using Jenkins CI/CD pipelines
- Collaborate on UI/UX design, creating website layouts and prototypes with Figma
- Design and prepare project demo slides and presentations for customers and stakeholders
- Work closely with backend teams and designers to deliver high-quality, user-friendly products

Card System Developer (Full Stack)
ABA Bank   2023 - 2025

- Develop web applications using HTML5, CSS3, jQuery, and PHP to support internal operation
- Implement backend services using PHP and Oracle Database
- Create and maintain database objects such as procedures, views, functions, and cron jobs for data processing
- Integrate card system data with other departments based on business requirements
- Query and analyze card transactions according to requests from other departments
- Perform system testing and deploy applications to the production environment
- Design UI/UX on Figma propose to manager for user friendly and convenience

- Critical Thinking

- Leadership

- Problem Solving

Skill

Frontend Development

- HTML5, CSS3, BootStrap

- Javascript, Jquery, Ajax

- Vue.js, Nuxt.js, Vue Router,

  Pinia

- React.js, Next.js, React Router,

  Redux

- Tailwindcss, Motion

- Vue UI Component

- React UI Component

- Axios

Backend Development

- C#, ASP .Net

- PHP

- Go

- SQL Server

- Oracle DB

- Sql Query / PLSQL

- My SQL DB

UI/UX Design

- Figma

Senior Frontend Developer
Technology Cambodia   2023- 2023

- Develop websites using Vue 3 and Nuxt.js
- Integrate Directus as a CMS for backend content management
- Use Axios to connect and consume APIs from the Directus CMS
- Test, build, and deploy applications to Linode servers
- Meet with customers to gather and clarify website requirements
- Collaborate on UI/UX design, creating website layouts and prototypes with Figma

Web Developer (Full Stack)
One Click Solution   2019- 2023

- Design, develop, and maintain web applications and websites using HTML5, CSS3, JavaScript, jQuery, and Vue.js (Vue 2)
- Build responsive, cross-browser compatible user interfaces following modern web standards
- Develop and customize WordPress websites, including theme customization and plugin integration
- Implement backend logic and RESTful APIs using C# and ASP.NET
- Design, query, and maintain SQL Server databases, including tables, views, and stored procedures
- Integrate frontend applications with backend services and databases
- Build, test, and deploy applications to production environments following release processes
- Collaborate with UI/UX designers to create wireframes, layouts, and interactive prototypes using Figma
- Participate in requirement analysis, technical discussions, and solution design
- Maintain existing systems by debugging issues, optimizing performance, and applying enhancements
- Work closely with cross-functional teams to ensure high-quality and timely project delivery

Version Control

- GIT Lab

- GIT Hub

- Docker

- Jira, Confluence

Achievement

- School Management

- Clinic Management

- Restaurant Website

- Card Transaction System
  Center for internal support

- Operations Dashboard System

- Online Product Website

- Card Transaction Dispute
  System

- News Website

- Clinic Website

Language

- **Khmer**
  Mother Tongue

- **English**
  Good (Listening, Speaking and Writing)
